

# How to Store TEPEZZA for Your Appointment

Enclosed is your TEPEZZA medicine for your upcoming home infusion. You will likely have more than one carton.

Follow these instructions to store the cartons correctly:

Keep the vial inside the TEPEZZA carton.  
If you see damage to the carton, please contact your home infusion provider

Store the carton in your refrigerator, making sure it is set between 36°F and 46°F (2°C and 8°C)

Keep away from light

Do not freeze

Remember, TEPEZZA must be stored in your refrigerator between 36°F and 46°F (2°C and 8°C) and protected from light until it's ready to be mixed. Your home infusion provider will mix your TEPEZZA before they give it to you.

## **A Patient Access Liaison (PAL) can help with your questions**

Now that you and your doctor have decided TEPEZZA is right for you, you can ask to be paired with a PAL. A PAL provides dedicated, one-on-one support during your treatment journey. They work directly with you to answer non-medical, logistical questions and provide support. They are experienced in helping you navigate the insurance process, start treatment, and provide ongoing support throughout treatment with TEPEZZA.

### **Reach out to your Patient Access Liaison to help you:**

- Avoid surprises at the start of treatment by talking about what to expect
- Understand financial assistance options
- Learn about the insurance process
- Determine how your new treatment can fit into your routine and meet your personal goals
- Receive non-medical educational support

**Interested in speaking with a PAL? Just call**  
**1-833-583-7399**  
**Monday - Friday, 8 AM - 8 PM ET**
