

Brandy: My name is Brandy McCracken and I'm a Patient Access Manager for Horizon.

If your doctor prescribes TEPEZZA, you can be paired with a Patient Access Manager. Your Patient Access Manager can help you navigate the treatment process.

We advocate for the patient to make sure that they have a site of care where they can have therapy. We make sure that they're informed about insurance coverage as well as any co-pay support.

The Patient Access Manager is available to answer questions for patients, make sure that they have great support and direction on when to talk to their doctor.

There are a lot of different areas that patients may not have exposure to, so having someone to talk you through the process in a very personalized way, utilizing information from your story, your insurance, your doctor, to really make this treatment work for you is incredibly unique.

At the end of the day, I know I've done my job when patients say, "Hey, thank you. Hey, you care. Thanks for listening. You're the first person I've ever spoken with who even understands this disease." When I have a patient that feels calm, that feels like they have hope, that feels comfortable in the process, that's when I know I've done my job.

INDICATION AND IMPORTANT SAFETY INFORMATION

USE:

TEPEZZA is a prescription medicine used to treat Thyroid Eye Disease.

IMPORTANT SAFETY INFORMATION

What is the most important information I should know about TEPEZZA?

Infusion reactions can happen during or within 24 hours after your infusion of TEPEZZA. If you have a reaction while receiving TEPEZZA, your doctor or nurse will slow or stop your infusion and treat your reaction. If you have a severe infusion reaction, your doctor may stop your treatment completely.

Tell your doctor or nurse right away if you have any of these symptoms during or after your treatment with TEPEZZA:

- **High blood pressure**
- **Fast heartbeat**
- **Redness of the face/Feeling hot**
- **Difficulty breathing**
- **Headache**
- **Muscle pain**

If you have inflammatory bowel disease (IBD), such as Crohn's disease or ulcerative colitis, TEPEZZA may make your IBD symptoms worse. Symptoms of worsening IBD may include: an increased number of loose stools with stomach pain or cramps, and blood in your stools. After each TEPEZZA infusion, tell your doctor right away if you have worsening IBD symptoms.

TEPEZZA may cause an increase in your blood sugar. Before starting treatment with TEPEZZA, tell your doctor if you are currently being treated for diabetes, know your blood

sugar is high, or have been diagnosed with diabetes. It is important for you to take your treatments and follow an appropriate diet for glucose control as prescribed by your doctor.

Before receiving TEPEZZA, tell your doctor if you:

- Have inflammatory bowel disease (Crohn's disease or ulcerative colitis).
- Are currently being treated for diabetes, have been diagnosed with diabetes, or know your blood sugar is high.
- Are pregnant or plan to become pregnant. TEPEZZA may harm your unborn baby. Tell your doctor if you become pregnant or suspect you are pregnant during treatment with TEPEZZA.
 - Women who are able to become pregnant should use an effective form of birth control (contraception) prior to starting treatment, during treatment and for at least 6 months after the final dose of TEPEZZA.
- Are breastfeeding or plan to breastfeed. It is not known if TEPEZZA passes into your breast milk. Talk to your doctor about the best ways to feed your baby during treatment with TEPEZZA.
- Tell your doctor about all the medicines you take, including prescription and over the counter medicines, vitamins, dietary and herbal supplements. Know the medicines you take. Keep a list of them to show your doctor and pharmacist when you get a new medicine.

What are the possible side effects of TEPEZZA?

The most common side effects of TEPEZZA include muscle cramps or spasms, nausea, hair loss, diarrhea, feeling tired, high blood sugar, hearing problems, taste changes, headache, and dry skin.

This is not a complete list of all possible side effects. Tell your doctor or treatment team if you have any side effect that bothers you or that does not go away.
